TRANSBAYEAL ARMY DOCTORS ACTIVE IN RESEARCH

Army doctors of the Transbaykal Military District Hospital have been very active in scientific research. Doctor-Lieutenant Colonel Leonid Denisovich Gubakiy has been doing valuable X-ray research on the lymphatic system. He has conducted a number of experiments on the role of the lymphatic system in healing gunshot wounds and fractures. Major Igumov, Medical Service, has developed a radical method of treating extreme cases of foot soreness. Lieutenant Colonel Patik, Medical Service, has developed effective methods of treating angina. Both he and Major Igumov will soon defend their dissertations for the title of Candidate in Medical Sciences.

Lieutenant Kuhnertiz, Medical Service, has gone to the city of Molotov to defend his dissertation on "Acute Bacillary Dysentery." Major Uteyer is working on "Tissue Therapy in Various Neurostatic Cases According to Academician Filatov's Method." Lieutenant Colonel Iorin is working on "Ecotologic Morphology as an Indicator of Acclimatization in the Transbayral Region." Lieutenant Colonel Teytelbaum, Medical Service, recently defended his candidate's dissertation. Lieutenant Colonel Sokolov, Candidate in Medical Sciences, is preparing his dissertation on the pulmonary system.
